Re: Annual Customer Proprietary Network Information Compliance
Certification; EB Docket No. 06-36

Dear Ms. Dortch:

Please find the attached Annual Customer Proprietary Network Information
("CPNI") Compliance Certification for Business Telecommunications Services, Inc. Please feel
free to call me if you have any questions regarding this filing.

Sincerely,

Devin L. Crock

Attachment

Annual Customer Proprietary Network Information Certification
Pursuant to 47 C.F.R. § 64.2009(e)
EB Docket No. 06-36
February 2008

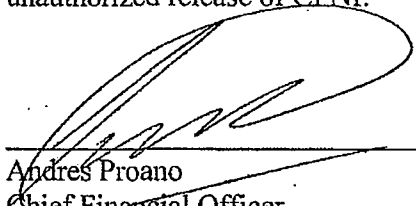

Name of Company: Business Telecommunications Services, Inc.
Form 499 Filer ID: 822338
Name of Signatory: Andres Proano
Title of Signatory: Chief Financial Officer

I, Andres Proano, certify that I am an officer of Business Telecommunications Services, Inc. ("BTS"), and acting as an agent of BTS, that I have personal knowledge that BTS has established operating procedures that are adequate to ensure compliance with the Commission's CPNI rules. *See* 47 C.F.R. § 64.2001 *et seq.*

Attached to this certification is an accompanying statement explaining how BTS's procedures ensure the company is in compliance with the requirements set forth in sections 64.2001 *et seq.* of the Commission's rules.

BTS has not taken any actions (instituted proceedings or filed petitions at either state commissions, courts, or at the FCC) against data brokers in the past year. BTS has no information outside of Commission Docket No. 96-115, or that is not otherwise publicly available (*e.g.*, through news media), regarding the processes pretexters are using to attempt to access CPNI. The steps the company has taken to protect CPNI include updating its CPNI practices and procedures and conducting new training designed to ensure compliance with the FCC's modified CPNI rules.

BTS has not received any customer complaints in the past year concerning the unauthorized release of CPNI.

Andres Proano
Chief Financial Officer
Business Telecommunications Services, Inc.

Date: _____

Customer Proprietary Network Information Certification Attachment A

BTS has established practices and procedures adequate to ensure compliance with Section 222 of the Communications Act of 1934, as amended, and the Federal Communications Commission's ("FCC") rules pertaining to customer proprietary network information ("CPNI") set forth in sections 64.2001 – 64.2011 of the Commission's rules. This attachment summarizes those practices and procedures, which have been updated so that they are adequate to ensure compliance with the Commission's CPNI rules, as modified by the Commission in 2007.

Safeguarding against pretexting

- BTS takes reasonable measures to discover and protect against attempts to gain unauthorized access to CPNI, including the authentication of customers prior to disclosing CPNI based on customer-initiated contacts. BTS is committed to notify the FCC of any novel or new methods of pretexting it discovers and of any actions it takes against pretexters and data brokers.

Training and discipline

- BTS trains its supervisory and non-supervisory personnel in an effort to ensure that its employees, in accordance with FCC regulations: (a) understand what CPNI is, (b) join in and carry-out BTS's obligation to protect CPNI, (c) understand when they are and when they are not authorized to use or disclose CPNI, (d) obtain customers' informed consent as required with respect to its use for marketing purposes, and (e) keep records regarding receipt of such consent, customer complaints regarding CPNI and the use of CPNI for marketing campaigns.
- BTS employees are required to review BTS's CPNI practices and procedures outlined in its Code of Conduct and to acknowledge their comprehension thereof.
- BTS has an express disciplinary process in place for violation of the company's CPNI practices and procedures. The careless or intentional failure to comply with these practices and procedures may result in disciplinary action, up to and including discharge.

BTS's use of CPNI

- BTS may use CPNI for the following purposes:
 - To initiate, render, maintain, repair, bill and collect for services;
 - To protect its property rights; or to protect its subscribers or other carriers from fraudulent, abusive, or the unlawful use of, or subscription to, such services;
 - To provide inbound telemarketing, referral or administrative services to the customer during a customer initiated call and with the customer's informed consent.
 - To market additional services to customers that are within the same categories of service to which the customer already subscribes;
 - To market services formerly known as adjunct-to-basic services; and
 - To market additional services to customers *with the receipt of informed consent via the use of opt-in or out-out, as applicable.*
- BTS does not disclose or permit access to CPNI to track customers that call competing service providers.

- BTS discloses and permits access to CPNI where required by law (e.g., under a lawfully issued subpoena).

Customer approval and informed consent

- BTS does not use CPNI for marketing purposes. BTS also does not share, sell, lease, or otherwise provide CPNI to any of its affiliates, suppliers, vendors, or any third parties for any type of service marketing purposes. If BTS changes this policy, it will implement a system to obtain approval and informed consent from its customers prior to the use of CPNI for marketing purposes. This system also will allow for the status of a customer's CPNI approval to be clearly established prior to the use of CPNI. Records of approvals will be maintained for at least one year.

One time use

- After authentication, BTS may use oral notice to obtain limited, one-time approval for use of CPNI for the duration of a call. The contents of such notice will comport with FCC rule 64.2008(f).

Additional safeguards

- BTS requires supervisory approval for all marketing campaigns and maintains for at least one year records of such marketing campaigns, including a description of each campaign, the products offered as part of the campaign, and details of what information is used in connection with the campaign.
- BTS designates one or more officers, as an agent or agents of the company, to sign and file a CPNI compliance certificate on an annual basis. The certificate conforms to the requirements set forth in FCC rule 64.2009(e).
- For customer-initiated telephone inquiries regarding or requiring access to CPNI, BTS authenticates the customer (or its authorized representative), through a dedicated account representative and a contract that specifically addresses BTS's protection of CPNI. In the event a customer does not have a dedicated account representative, BTS will authenticate the customer without prompting through the use of readily available biographical or account information, such as through the use of a pre-established password. If the customer cannot provide sufficient authentication, then BTS only discloses call detail information by sending it to the customer's address of record, or by calling the customer at the telephone number of record.
- BTS does not permit online customer access to CPNI, nor does it have retail locations where customer may request access to CPNI.
- BTS notifies customers immediately of any account changes, including address of record, authentication, and password related changes.
- In the event of a breach of CPNI, BTS will notify law enforcement as soon as practicable and no later than seven (7) business days from discovering the breach. Customers will be notified after the seven (7) day period, unless the relevant investigatory party directs BTS to delay notification, or BTS and the investigatory party agree to an earlier notification. BTS will maintain a record of all CPNI security breaches, including a description of the breach and the CPNI involved, along with notifications sent to law enforcement and affected customers.
